## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, and 12-15, drawn to stage apparatus and vibration control method, classified in class 248, subclass 638.
- II. Claims 8-11, drawn to stage apparatus actuator core, classified in class 310, subclass 12.
- III. Claims 16-36, drawn to an exposure apparatus and method of transferring a pattern of a mask and measuring and positioning the optical member and optical system, classified in class 355, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a vibration control method and the stage apparatus of Invention I, and the stage apparatus having the actuator core of Invention II are not required in the exposure apparatus and the method of transferring a pattern of a mask as in Invention III. The subcombination has separate utility which is not limited to the exposure apparatus and method of Invention III.

Art Unit: 2851

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.

A telephone call was made to Mario Constantino on September 5, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Kim whose telephone number is (703) 305-0105. The examiner can normally be reached on Monday-Thursday from 8:30 AM to 6:00 PM. The examiner can also be reached on alternate Fridays during the same hours.
